

## Turn your glass into radiators

Ultra-slim FINEO glass has a U-value of 0.7 W/(m<sup>2</sup>.K), which is equivalent to triple glazing and up to **8 times better** than single glazing.

Retrofitting FINEO into your existing timber-framed windows will transform them into invisible radiators by keeping heat in and cold out, no matter what the temperature is outside.

## Ultra-Slim Design For Maximum Indoor Comfort

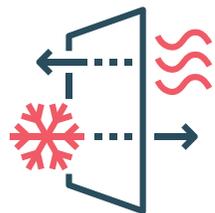

### Retrofit into Existing Window Frames

Replace the original glass with Fineo, the width of single glazing and warmth of triple glazing.

Fineo retains the authentic look of **timber** and **sash** windows while delivering exceptional thermal performance.

### Enjoy a Quieter Environment

With FINEO you can relax in peace and quiet, a world away from all the noise and bustle. FINEO delivers superb **traffic noise reduction**, easily outperforming other glazing products typically installed in home and work environments.

### Maximise Thermal Performance

With FINEO insulating glass you will feel much warmer compared to single or double glazing. Why? Due to FINEO's exceptional **low U-value**, the internal pane is warmer, which in turn eliminates draughts and cold spots.

FINEO's new advanced vacuum glazing technology delivers astonishing energy performance. It combines **exceptionally high thermal insulation with impressive noise reduction and unprecedented sustainability** in one superb product. FINEO easily outperforms and outlives ordinary insulating glass.

This thin vacuum-insulating glass boasts an **elegant, slim look**, ensuring maximum use of **sunlight and solar energy**.

FINEO insulates equally as well as triple glazing, but is **lighter and thinner**, meaning it can be installed into existing window frames. This often makes FINEO the most **cost-effective solution for renovation and restoration projects**.

FINEO is **100% recyclable** and does not contain any inert gases or organic seals which means **it will not deteriorate over time**.

Fineo has a market-leading guarantee of **15 years** but has a life expectancy of much longer.
